Little Canada, MN 55117

Dear Kyle,

The John Breslow Ice Hockey Center is now open thanks in large part to the expertise of Rink-Tec.. This project was cultivated nearly 8 years ago when John Breslow made a large donation in hopes of creating a facility that could be enjoyed by the city of Lincoln and the University of Nebraska. Mr. Breslow, former co-owner of the Phoenix Coyotes NHL team, has a passion for youth being involved in the sport of ice hockey.

We want to express our sincere thanks to the entire Rink-Tec family. Your lead field men, Florian, Lowell and Eric are top notch in their fields. Their leadership and foresight in the field made the installation process of the ice plant and rink very understandable.

Rink-Tec's partnership with Kingery Construction Co. was critical to landing the project and producing an outstanding finished project. Your guidance through the design process with the architect, engineers and ourselves was most helpful.

Building an ice rink in the heart of the country is not a common project. Anticipating that the need for ice time will increase with the Breslow Ice Hockey Center, we will most definitely request to partner with you again when the time comes to add the second sheet of ice or any other projects.

We couldn't be more pleased that Rink-Tec was an integral part of our project. We would highly recommend that anyone planning on constructing an ice rink utilize the services of Rink-Tec.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Rick Wintermute', is written over a light blue horizontal line.

Rick L. Wintermute
Vice President
Kingery Construction Co.
